

Division Situations

For each problem, show how you found your solution.

1. Five people picked up shells at the beach. They found 171 shells. They want to share them equally. How many shells will each person get?

2. Five friends earned 171 dollars with a car wash. They want to share the money equally. How much will each person get?

3. A group of 171 children are going to the zoo. They will travel in cars that hold 5 passengers. How many cars will they need?

4. There are 171 fifth graders. They need to form 5 teams for a field day. How many fifth graders should be on each team?
